Meri J.

Of course we understand you are waiting **for** apps ~~of~~ **on iPhone iOS** and Android.

 I crossed out iPhone because usually if the app works on the iPhone it can work on an iPod Touch and an iPad. I have an iPod touch and use it to use iOS apps.

We pray for your happiness since I'm uncertain how much I accept your goodness.

しろ: Thank you very much! Can't wait! ^^)

哥哥(Michael): Hi, I like your new launched smartphone version.

Shizuto (Ryo - ريو - 료): That's a great improvement!

nancy4366: 훌륭한 뉴스가 있지만 지금은 전 스마트폰을 사야 해요! ㅎㅎ

Lephtis: Wow! Smartphone version will help us brush up our skills easily than before.
I'm looking forward to using it.

Nicokdo: Thanks for updating Lang-8 but I'm still having problems with Firefox when I want to post corrections... Could you fix it please?

By the way, the grey colour is almost unreadable, could you change it into green, please?

satoshi: It is better that you produce a HTML5 app rather than an Android app because it works well on Android.

kwanheum: 훨씬 좋아졌어요. 여러모로 감사합니다.

Yoshio: That's great! Since my PC is broken at the moment, only iPad is available.

Meri J.: I don't have a smartphone, but many of my Lang-8 friends will be very happy about this news. :)

happy!R: I think a good mobile version of the website is better than having an app. It requires the application online anyway. Why makes the hassle to maintain an app when you can just access on your browser?

Nikolaos: Thank you! Now that I can easily access and use the site, I intend to become more active and possibly buy a premium membership in the coming weeks.

Taicho: iPhoneで入力してみました。青字は無いのですか？

star_gs99: I haven't been on here in a long time, so I was surprised when I went on here just yesterday and saw this version, because I use a tablet a lot nowadays. I really like that I could easily correct journal entries without switching over to the classic version and having to know all those codes.

The only problem I've been having with it is finding the groups I've joined on here. (One of them is a Shiritori group.) The only way I could possibly find them is by notifications. Maybe I should try to go on the web version? Also, when I clicked on the notifications to see the group update, I noticed a box where you could post, write, look at friends' journals, etc blocking the top of the page. Even clicking on the X on it doesn't help and seems to make it worst. So I end up going back to the main page. Can you fix this?? Thanks.^^

lang-8 staff: We have fixed the problem of correction happend with older version of Firefox and IE8, IE9 We are very sorry for the inconvenience. Please reload your page with pressing F5 button. If there still are problem please email us. info@lang-8.com

Iris: I'm excited to try it out! Thank you!
